SUMMARY

Pre-final year B. Tech Computer Science student and Full Stack Developer specializing in Java backend and React.js frontend. Skilled in building scalable, secure, and efficient web applications using Spring Boot, REST APIs, and modern frontend frameworks. Passionate about backend architecture and emerging technologies, with hands-on experience in AI and blockchain-based automation projects.

EDUCATION

➤ Senior Secondary School | 2022

Government Sarvodaya Bal Vidyalaya No. 1 Sarojini Nagar | Percentage: 78%

Focused on Physics, Chemistry, and Mathematics along with additional subjects.

➤ B. Tech in Computer Science & Engineering | 2027

Dronacharya Group of Institutions | CGPA: 7.4 (till 4th semester)

Focused on Data Structures and Algorithms (DSA) along with OOPS and core Computer Science subjects.

INTERNSHIP AND CERTIFICATES

Blockchain Developer Intern | QuadBTech (BlockseBlock) | Jul 2025 – Aug 2025 | Remote, New Delhi

Designed and implemented the core business logic and data processing layer for a real-time fraud detection platform on the ICP blockchain. Developed secure and optimized backend APIs in Java and Python to handle transaction data pipelines with MongoDB integration. Built event-driven data flows for fraud analytics and ensured system scalability through efficient API design and modular service structure.

Certifications: Blockchain Development (ICP), Java Spring Boot, Machine Learning with Python

TECHNICAL SKILLS

Programming languages: Java (Core & Advanced) + DSA + OOPS, Python, C++, Rust (Basics).

Frameworks & Libraries: Spring Boot, REST APIs, Microservices, React.js, Redux, Tailwind CSS, Node.js.

Databases: Relational – MySQL, PostgreSQL | NoSQL – MongoDB, Redis, Firebase.

Tools & Technology: Git, Linux, Docker (Basics), IntelliJ IDEA, VS Code, Maven, Gradle, ICP Blockchain.

PROJECTS

1. AI-Powered Code Review Agent | [Links](#)

AI tool that automatically reviews codebases, detects logic and performance issues, and suggests improvements using NLP and ML models.

2. DevKit-Java: The Offline Developer's Toolbox | [Links](#)

Offline Java desktop suite with 20+ tools (JSON/YAML formatters, JWT/Base64 encoders, UUID/hash generators). Built with JavaFX, CSS, and packaged using jpackage for cross-platform use.

ADDITIONAL INFORMATION

Languages: English, Hindi, Japanese (Beginner)

Achievements: Dora Hacks ICP Hackathon Participant, Lead Developer of Project Drishti

Interests: System Design, Backend Development, Web3, Fitness, Content Creation
